

Pseudocode for Ticket Booking

```
function bookTickets()
{
    display <username>_trip.txt file;
    display <transportModes.txt> file;
    Enter choice for transport:
        Primary key of chosen mode of transport;
    Add choice to <username>_trip.txt file;
    Option:
        1. Confirm booking
        2. Cancel booking
        3. Quit
    If(option == 1)
    {
        create file <tickets.txt>;
        add data of <username>_trip.txt file to <tickets.txt>;
        display <tickets.txt> file;
    }
    else if(option == 2)
    {
        Go back to user screen;
    }
    else
    {
        Exit the program;
    }
}
```
